Passerelles Numériques
A Gateway for Life

BECOME
INTERNSHIP PARTNERS
OF PN VIETNAM

WHY CHOOSE US ?

" The internship positions were designed as the opportunities for PNV students to practice and learn in world class development teams at KMS. The students caught up very quickly and became important contributors. We ended up hiring all of them. The talent hunting and the education program at PN Vietnam is exceptional and we are very proud to support this cause. "

MAKE A DIFFERENCE

MEET OUR ALUMNI

"After spending 5 months at NICV during the graduation internship program, I recognize that I am more and more mature. In those 5 months, I met a lot of people with a great deal of experience in the IT field. I'm so glad to be recognized as the MVP of the program by the fellow interns. I've not only become official NICV-er but this opportunity also opened up a new world for me to develop my career path in the IT sector."

Hà Mộng Khang
PNV alumni
Software Engineer at NICV

nab

"My internship company had high demands in self-study, technical & soft skills, of which I was confident of thanks to the 3-year training at PNV. I myself never stopped learning to better meet the working requirements. As a result, I joined 2 real projects after two months of internship and eventually became an official employee at PTC."
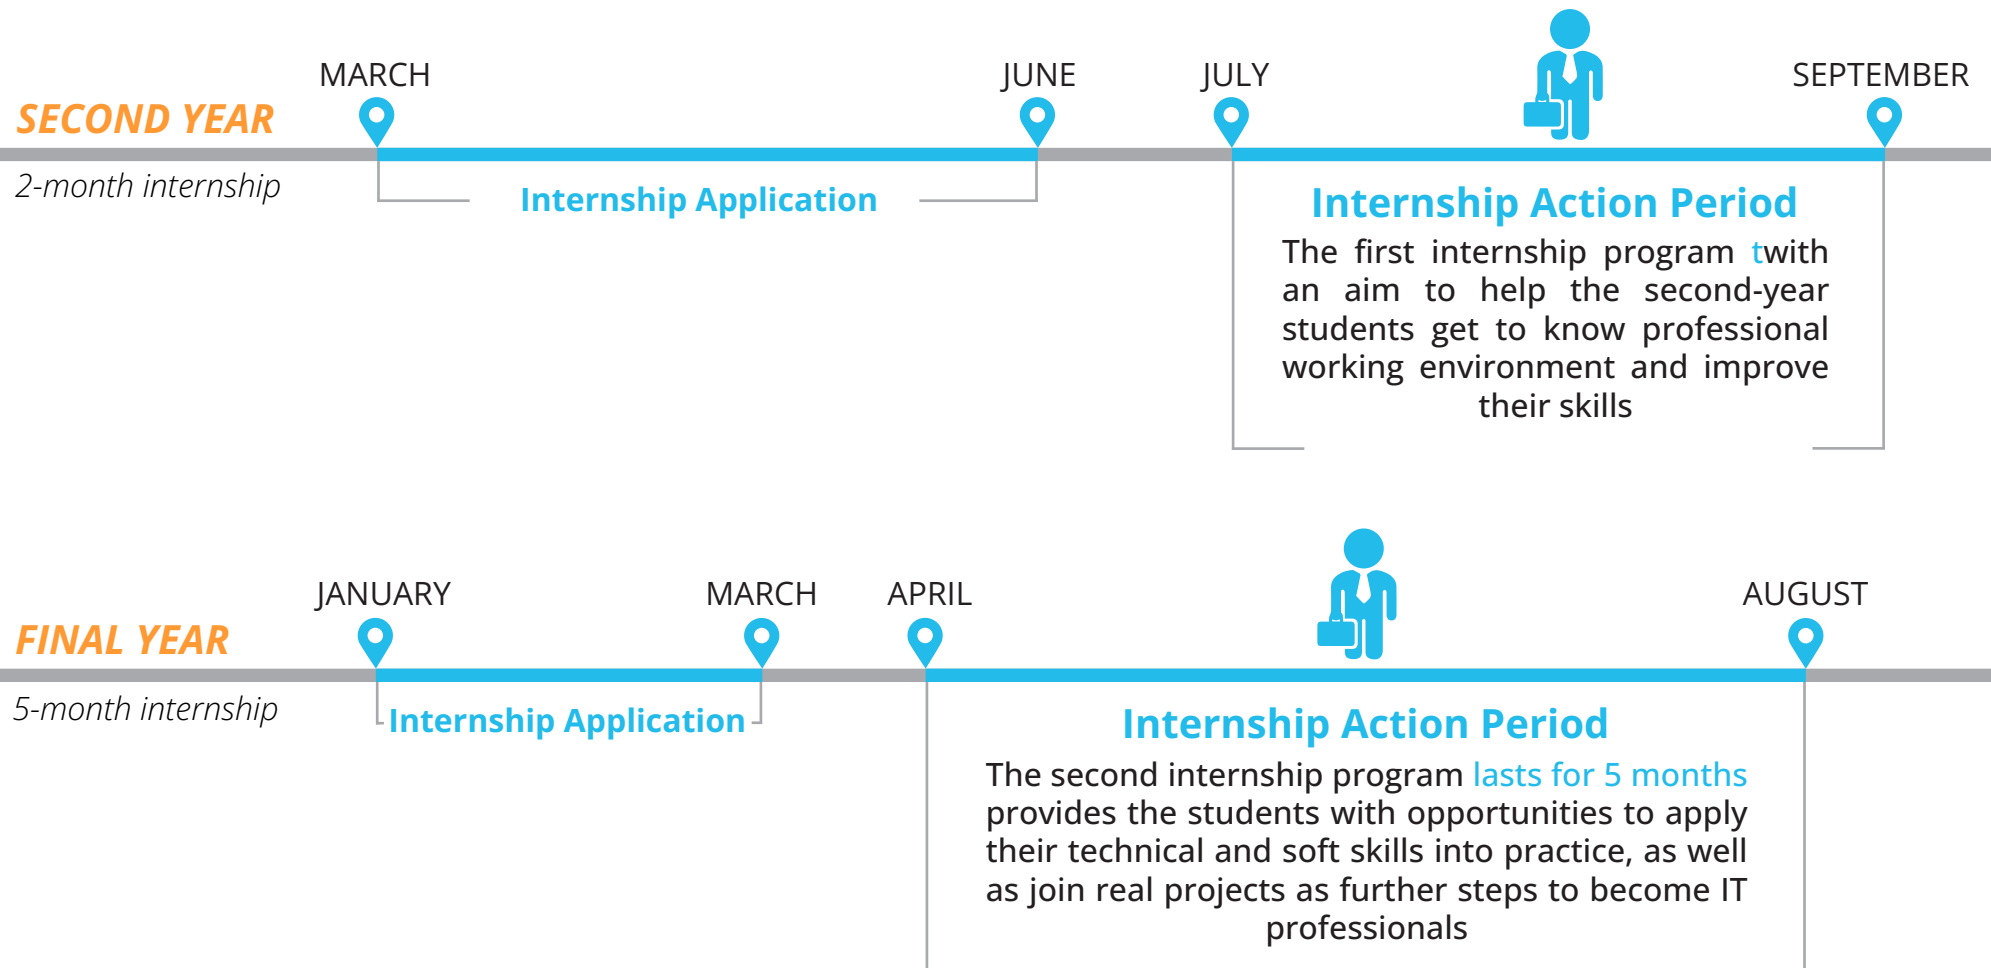

Hồ Thị Như Quỳnh
PNV alumni

		Basic Web Project	Advanced Web Project	Specialized Module (Web - Mobile - Testing)	
			2 months Internship		

ENGLISH

English occupies a central place in the PN training approach, as much as 25% of the training program is dedicated to it. With a target on TOEIC 500+, PN is aiming for students to be able to listen and read with ease. An intense focus is made on communicative English with classes stressing pronunciation and speaking throughout the curriculum, along with the regular application of written English in presentations and making reports on subjects. As a result, PNV students get a good environment to develop their English skills comprehensively.

During the second year of our training program, students also participate in the weekly English Club to practice speaking English with foreigners, helping them gain confidence in using this language on a daily basis.

SOFT SKILLS

Soft skills are a lifelong learning that will occupy **25% of the training** time during PN scholarship to help students be able to **work effectively** in the company while using organizational tools with ease (Coggle, Trello, Google-suite).

Learning to learn

The students discover themselves and their learning styles to find the most suitable learning technique for best training progresses

Job application

The students prepare themselves for the recruitment reality to improve their chances at employability

Professionalism

The students practice positive attitudes to enhance their influences and adaptability in their working environment

Thinking & Mindset

The students attend workshops and special modules to boost their confidence and analytical thinking skills, as well as their ambition and vision for future developments

Entrepreneurship Program

Annually, final year students join a 2-phased journey of developing & pitching IT start-up ideas and from which creating the real products of Information Technology innovations. Nearly 20 IT & start-up professionals participate in the program as mentors and juries.
